

CERAMIC GLAZED CONCRETE FACADES

*My dream is to develop
bendabel, large scale and thin
ceramics
with an aesthetic
we when it surrounds us as
coffee cup
Art
building envelope and
urban furniture and ground
will kiss and embrace
feeling ourselves
as sentient beings
A ceramic based on concrete.
Anja*

Specific Glazed Concrete facades, 160 x 20-50 x 1-2 cm, for future concrete buildings, made by Anja Margrethe Bache, Photos Ole Akhøj, drawings anja, computerdrawing Rasmus Holst. Fundfinanced Project by Fonden Realdania and DTU. Made with the designmethod *Design in a Broad Perspective* as a synthesis between art, design, architecture and technology. A book will be published at Polyteknisk Forlag december 2013 describing both the designmethod and the specific ceramic glazed concrete.
